

Mykhailo Troynin

AI Product Documentation Strategist

+380 97 685 73 17 | mihajlotrojin@gmail.com

Telegram: @Troynin_M | Kyiv, Ukraine (remote, US + EU timezones)

PROFESSIONAL PROFILE

AI Product Documentation Strategist with 7+ years in technical documentation and 2+ years actively integrating AI tools into documentation workflows. Created 100+ documents using AI-assisted workflow, developed 15+ custom AI skills for documentation tasks. 5x+ acceleration in documentation creation vs traditional approach.

Specialization — building the full AI documentation cycle: from codebase exploration through MCP server configuration and AI agent creation to automated generation and validation of documentation. Hands-on experience with Claude Code, AMP Code, Cursor, Codex.

AI STACK

AI Agents: Claude Code, AMP Code (Cursor-based), Cursor, Codex

LLM Models: Claude (Sonnet/Opus), ChatGPT (GPT-4o), Gemini, Qwen, Kimi

MCP Servers: GitHub MCP, GitLab MCP, Atlassian/Jira MCP, Filesystem, Memory

AI Concepts: MCP (Model Context Protocol), RAG, Embeddings, Prompt Engineering

KEY COMPETENCIES

- AI Documentation Strategy — designing the full documentation cycle with AI: codebase audit, approach definition, custom skill creation, agent configuration, validation workflow
- Prompt Engineering for Documentation — developing prompt templates for repeatable tasks: outline endpoint reference, translate code to prose, hallucination review. 15+ production-ready skills
- Codebase-to-Docs — codebase exploration via Claude Code, generating documentation from code, creating architecture descriptions of modules, dependencies, APIs and edge cases
- API Documentation — OpenAPI 3.0, Swagger, Postman, REST API, RPC API, GraphQL, WebSocket. 25+ documented projects
- Hallucination Prevention — systematic approach: every AI statement treated as hypothesis for verification against source code, API responses and SME feedback. 8-point checklist

WORK EXPERIENCE

NovaDigital LLC

2024 — Present

AI Product Documentation Strategist

- Developed AI documentation strategy for 15+ Backend (Java, PHP8) and Frontend (React, TypeScript) projects
- Created 100+ documents using AI-assisted workflow (5x+ acceleration)
- Developed 15+ custom AI skills for documentation task automation
- Configured and integrated 5 MCP servers (GitHub, GitLab, Jira, Filesystem, Memory) into documentation pipeline
- Built AI workflow: exploration → skill creation → AI draft → technical validation → publishing
- Implemented hallucination prevention checklist for AI output validation
- Created API documentation (REST API, RPC API) for 10+ microservices (OpenAPI 3.0, Postman)
- Documented architecture: BPMN 2.0, Sequence diagrams, connection flowcharts
- Documented CI/CD, Docker, Kubernetes deployment — reduced onboarding time by 40%

SE «Electronic Health»

2023 — 2024

Lead Business Analyst / Team Lead Technical Writers

- Managed team of 7 technical writers, organized review and quality control processes
- Business process modeling AS IS / TO BE for 20+ medical applications (UML, BPMN, ER diagrams)
- API documentation for 15+ medical services according to FHIR standards
- Documentation for eHealth system serving 40+ million Ukrainians

- Prepared presentations for the Ministry of Health

Metinvest Digital LLC

2021 — 2022

Technical Writer

- User documentation for multiplatform products: Web, Android, iOS, Chatbot
- API documentation in Postman for industrial IoT systems
- SLA, OLA, Product Passport, Release Notes documentation
- Content localization for international projects

TECHNICAL SKILLS

API Documentation: OpenAPI 3.0, Swagger, Postman, REST, RPC, GraphQL, WebSocket, JSON

Docs-as-Code: Git, GitHub/GitLab, Markdown, MDX, AsciiDoc, Docusaurus, MkDocs, Jekyll

Modeling: BPMN 2.0, UML, ER diagrams, Sequence diagrams, Mermaid, PlantUML, Draw.io

DevOps / Collab: Docker, Kubernetes, CI/CD, Confluence, Jira, Notion

EDUCATION

Master's degree, National Transport University, Kyiv
